## In accordance with Regulation (EC) No. 1907/2006 and Regulation (EU) No. 2015/830

### SECTION 8 : EXPOSURE CONTROLS/PERSONAL PROTECTION

MTN HARDCORE

Code: AX014H002

## 8.1 CONTROL PARAMETERS:

If a product contains ingredients with exposure limits, may be necessary a personnel monitoring, work place or biological, to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to EN689, EN14042 and EN482 standard concerning methods for assesing the exposure by inhalation to chemical agents, and exposure to chemical and biological agents. Reference should be also made to national guidance documents for methods for the determination of dangerous substances.

### OCCUPATIONAL EXPOSURE LIMIT VALUES (TLV)

AGCIH 2015	<u>Year</u>	TLV-TWA		TLV-STEL		Remarks
		ppm	mg/m3	ppm	mg/m3	
Xylene (mixture of isomers)	1996	100.	434.	150.	651.	A4,BEI
Butane	2012	1000.	-	-	-	
Ethyl acetate	1996	400.	1440.	-	-	
Propane	2004	1000.	-	-	-	
Isobutane	2012	1000.	-	-	-	
2-methoxy-1-methylethyl acetate		50.	275.	100.	550.	Recommended
						Skin
n-butyl acetate	2015	50.	237.	150.	713.	
Ethylbenzene	2002	100.	434.	125.	543.	A3,BEI

TLV - Threshold Limit Value, TWA - Time Weighted Average, STEL - Short Term Exposure Limit.

Skin - Danger of cutaneous absorption.

A3 - Carcinogenic in animals.

A4 - Non classified as carcinogenic in humans.

BEI - Biological exposure index (biological monitoring).

Dermal (Vd): Means that, in exposures to this substance, the contribution by the cutaneous route, including the mucous membranes and eyes, may result significant for the overall body content if no measures are taken to prevent absorption. There are some chemicals for which dermal absorption, both in liquid and vapour phases, can be very high, and this route of entry may be or equal or greater importance even that inhalation pathway. In these situations, the use of a biological control is essential in order to quantify the overall amount of contaminant absorbed.

### **BIOLOGICAL LIMIT VALUES:**

This preparation contains the following substances that have established a biological limit value:

- Xylenes (technical or commercial grade) (2011): Biological determinant: methylhippuric acids in urine, BEI: 1.5 g/g creatinine, Sampling time: end of shift (2).

- Éthylbenzene (2013): Biological determinant: sum of mandelic acid and phenylglycolic acid in urine, BEI: 0.15 g/g creatinine Sampling time: end of shift (2), Notation: (Ns).

(2) When the end of the exposition not coincide with the end of the working day, the sample will be taken as soon as possible after the real exposition ceases.

(Ns) Non-specific. The determinant is non-specific, since it is also observed after exposure to other chemicals.

### DERIVED NO-EFFECT LEVEL (DNEL):

Derived no-effect level (DNEL) is a level of exposure that is considered safe, derived from toxicity data according to specific guidances included in REACH. DNEL values may differ from a occupational exposure limit (OEL) for the same chemical. OEL values may come recommended by a particular company, a government regulatory agency or an organization of experts. Although considered protective of health, the OEL values are derived by a process different of REACH.

Derived no-effect level, workers: - Systemic effects, acute and chronic: Xylene (mixture of isomers) Butane	DNEL Inhalation mg/m3 289. (a) 77.0 (c s/r (a) s/r (c	- (a) - (c)	DNEL Oral mg/kg bw/d - (a) - (c) - (a) - (c)

### SECTION 11 : TOXIC OLOGICAL INFORMATION

MTN HARDCORE

Code: AX014H002

No experimental toxicological data on the preparation is available. The toxicological classification for these mixture has been carried out by using the conventional calculation method of the Regulation (EU) No. 1272/2008~1221/2015 (CLP).

# 11.1 INFORMATION ON TOXICOLOGICAL EFFECTS:

### ACUTE TOXICITY:

Dose and lethal concentrations	<u>DL50</u> (OECD 401)	DL50 (OECD 402)	<u>CL50</u> (OECD 403)
for individual ingredients :	mg/kg oral	mg/kg cutaneous	mg/m3.4h inhalation
Xylene (mixture of isomers)	4300. Rat	1700. Rabbit	> 22080. Rat
Butane			>100000 Rat
Ethyl acetate	5620. Rat	18000. Rabbit	> 44000. Rat
2-methoxy-1-methylethyl acetate	8532. Rat	> 5000. Rat	> 35700. Rat
n-butyl acetate	10768. Rat	17600. Rabbit	> 23400. Rat
Ethylbenzene	3500. Rat	15400. Rabbit	> 17400. Rat
Polyhydroxyalkylamides	> 5000. Rat	> 2000. Rat	
2-butanone-oxime	2400. Rat	1840. Rabbit	> 4830. Rat
No observed adverse effect level	NOAEL Oral	NOAEL Cutaneous	NOAEC Inhalation
	mg/kg bw/d	mg/kg bw/d	mg/m3
2-butanone-oxime	125. Rat		90. Rat
Lowest observed adverse effect level	LOAEL Oral	LOAEL Cutaneous	LOAEC Inhalation
	mg/kg bw/d	mg/kg bw/d	mg/m3
2-butanone-oxime	40. Rat		-

# INFORMATION ON LIKELY ROUTES OF EX POSURE : Acute toxicity:

Routes of exposure	Acute toxicity	Cat.	Main effects, acute and/or delayed
Inhalation: Not classified	ATE > 20000 mg/m3	-	Not classified as a product with acute toxicity if inhaled (based on available data, the classification criteria are not met).
Skin: Not classified	ATE > 2000 mg/kg	-	Not classified as a product with acute toxicity in contact with skin (based on available data, the classification criteria are not met).
Eyes: Not classified	Notavailable	-	Not classified as a product with acute toxicity by eye contact (lack of data).
Ingestion: Not classified	ATE > 5000 mg/kg	-	Not classified as a product with acute toxicity if swallowed (based on available data, the classification criteria are not met).

### CORROSION / IRRITATION / SENSITISATION :

Danger class	Targetorgans	Cat.	Main effects, acute and/or delayed
Respiratory corrosion/irritation:	Respiratory tract	Cat.3	# IRRITANT: May cause respiratory irritation.
Skin corrosion/irritation:	Skin	Cat.2	IRRITANT: Causes skin irritation.
Serious eye damage/irritation:	Eyes	Cat.2	IRRITANT: Causes serious eye irritation.
Respiratory sensitisation: Not classified	-	-	Not classified as a product sensitising by inhalation (based on available data, the classification criteria are not met).
Skin sensitisation: Not classified	-	-	Not classified as a product sensitising by skin contact (based on available data, the classification criteria are not met).

ASPIRATION HAZARD:			
Danger class	Target organs	Cat.	Main effects, acute and/or delayed
Aspiration hazard: Not classified	-	-	Not applicable.
